

MIXING COLORS with Toulouse!

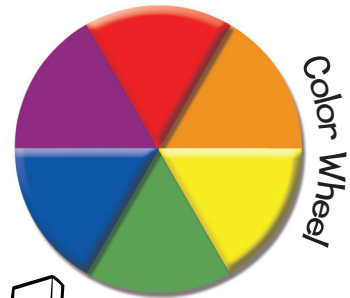

Artists use a color wheel to show them how to mix two different colors together to create a new color. Use the color wheel to help you learn how to mix your colors just like Toulouse, from Disney's THE ARISTOCATS Special Edition.

PRIMARY COLORS are Red, Yellow & Blue.

These are called Primary Colors because they are the only three colors that cannot be mixed from other colors. All other colors can be mixed from these three colors.

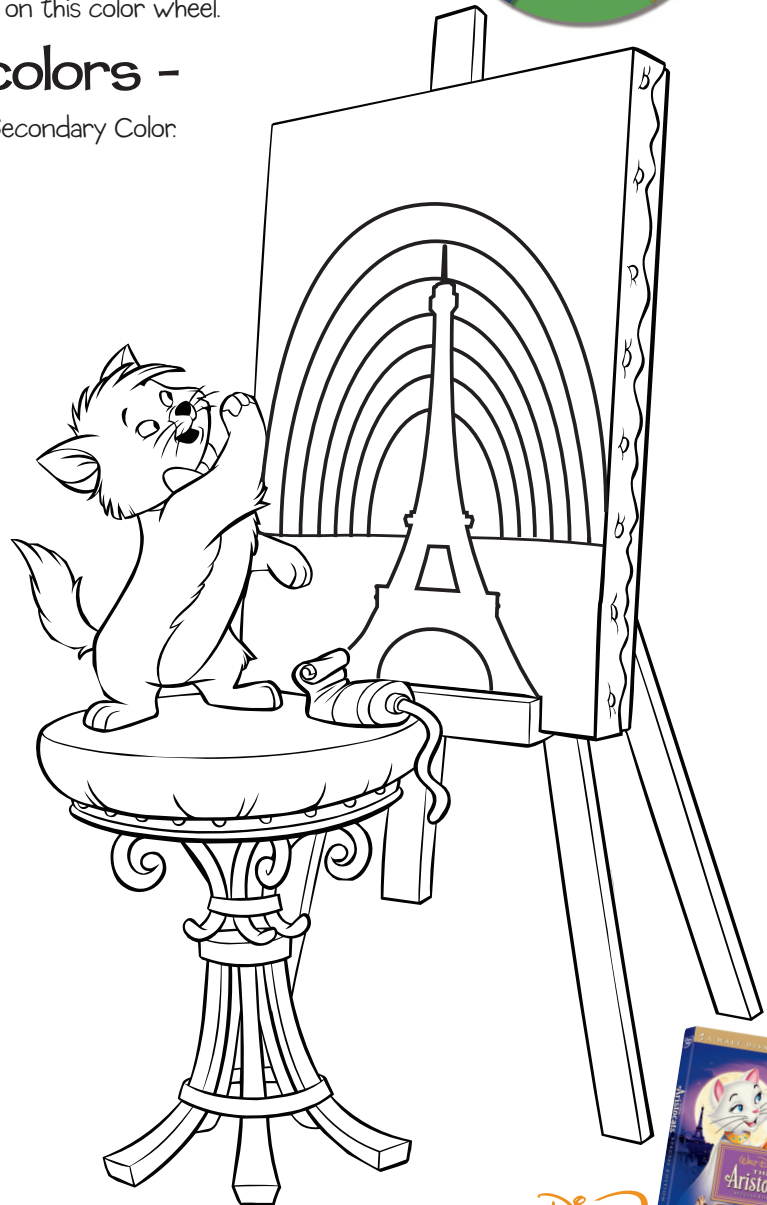

SECONDARY COLORS are Orange, Green & Purple.

These are called Secondary Colors because these are the colors that are created when you and Toulouse mix two primary colors together. See how the Secondary Colors fit between each of the Primary Colors on this color wheel.

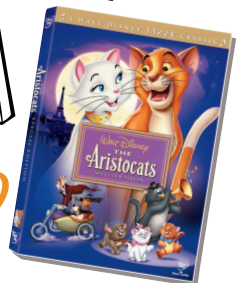

Help Toulouse mix his colors -

Circle the two Primary Colors that make the Secondary Color.

EXCELLENT!
You're ready to help Toulouse color his painting!

AVAILABLE NOW ON DISNEY DVD

ANSWERS: Red + Yellow = ORANGE • Yellow + Blue = GREEN • Red + Blue = PURPLE
